

17 SERVOS AND READY TO ROCK.

17 servos make i-SOBOT™ walk more like a human than most humans. A built-in gyro-sensor, 2 LEDs, and voice command recognition make him way more fun to have around than most people you know, not to mention the hundreds of pre-programmed actions, words and phrases that'll make your day. i-SOBOT™ also comes with rechargeable batteries and a remote control for instant control or programming, so he's ready to rock right out of the box.

TOMY®

i-SOBOT™

- 17 Custom Developed Servo-Motors
- 19 Integrated Circuit Chips
- 200+ Words/Phrases Speaking Vocabulary
- 2 LED Lights
- Built In Gyro-Sensor

ROBOT SIZE: H: 6.5" x W: 3.8" x D: 2.6"

WEIGHT: Approx. 12 oz (including batteries)

Capable of smooth and sophisticated bi-pedal movements requiring human-like, self-powered articulation including: Walking Forward, Backward and Side to Side, Dancing, Standing upright from a prone position and much, much more!

INCLUDES 4 MODES

- **Remote Control Mode**
Movements can be controlled directly using joysticks and command buttons or he performs hundreds of amazing pre-programmed actions using short button codes.
- **Special Action Mode**
Command i-SOBOT™ to play air guitar, impersonate a movie character or perform any of 18 pre-programmed special actions.
- **Programming Mode**
Program any action sequence into memory, up to 80 actions, then easily play back with the push of a button. A total of three memory sequences allow long programmed performances
- **Voice Command Mode**
iSOBOT™ recognizes 10 voice commands, reacting with dozens of appropriate but unpredictable actions.
